Deployment and Operations —

Argocd -

The screenshot displays the ArgoCD web interface. On the left is a dark sidebar with navigation links: Applications, ApplicationSets, Settings, User Info, and Documentation. Below these are filters for 'Favorites Only' and 'SYNC STATUS' (Unknown: 0, Synced: 4, OutOfSync: 0). The main panel, titled 'Applications', shows a table of four applications. Each row includes a star icon, the application name, a link to the repository, the revision (master), health status (Healthy), sync status (Synced), and a menu icon.

Name	Repository	Revision	Health Status	Sync Status
default eitoap-backend	https://github.com/utkarshstudent75-gif/enterprise-IT-Operation...	master	Healthy	Synced
default eitoap-common	https://github.com/utkarshstudent75-gif/enterprise-IT-Operation...	master	Healthy	Synced
default eitoap-frontend	https://github.com/utkarshstudent75-gif/enterprise-IT-Operation...	master	Healthy	Synced
default eitoap-root	https://github.com/utkarshstudent75-gif/enterprise-IT-Operation...	master	Healthy	Synced

```
atform/scripts$ kubectl get applications -n argocd
```

NAME	SYNC STATUS	HEALTH STATUS
eitoap-backend	Synced	Healthy
eitoap-common	Synced	Healthy
eitoap-frontend	Synced	Healthy
eitoap-root	Synced	Healthy
